

When spaces are wide and open, it's time to rely on Temperzone ECO air-cooled package units.

Combine a large commercial floor space and constantly changing heat loads, and you've got a climate control challenge that only Temperzone's ECO air-cooled technology can cope with.

Increasingly the go-to option for clubs and pubs across Australia, our highly responsive ECO air-cooled system is a premium package design that can always be relied upon to keep patrons comfortable. Complete package units designed to hook up to duct networks, they range in capacity from 18.6kW to 193.0kW and offer a broad spectrum of air conditioning solutions. They can even be used for smaller commercial applications and multi-storey buildings with appropriate duct design.

Some venues already experiencing the benefits of the Temperzone ECO range include:
